

Scale Strategic Outcomes Without Added Headcount

Fully Managed PMO

Why Strategic Initiatives Struggle

67% of strategies fail due to poor execution — Harvard Business Review (2022)

Scope Drift

Projects drift beyond original intent without strong structure, controls, and ownership.

Resource Strain

Teams get pulled in too many directions, with limited visibility into who owns what and why.

Hidden Risk

Small issues stay hidden until they become critical. Risk is often underreported to avoid conflict.

What is a Fully Managed PMO?

A **subscription-based service** that brings structure, control, and scalable execution to an enterprise project portfolio without the cost and burden of an internal PMO.

Why Choose Fully Managed PMO

Immediate Activation

Live in days. No recruiting, onboarding, or ramp-up time.

Cost Efficiency

Pay only for capacity used, not salaries, benefits, and overhead.

Breadth of Experience

Access to multi-client experience, not constrained to an individual.

Ruthless Transparency

Honest assessments without political filtering.

Proven Runbooks

Tested structures, controls, and risk frameworks from day one.

Elastic Capacity

Scale up when demand rises. Pull back when it slows.

How Pricing Works

Choose a monthly credit package. Work draws against that capacity, giving you flexible coverage without the fixed cost of operating an internal PMO.

Fully Managed PMO vs In-House PMO

	Fully Managed PMO	In-House PMO
Speed to Value	Operational in days	6—12 months to hire and ramp
Cost Structure	Predictable subscription model	Salary, benefits, overhead
Operating Model	Proven ROPE framework from day one	Built over time through trial and error
Continuity	Built-in continuity and backups	Delivery slows during staffing gaps
Experience depth	Multi-client knowledge base	Limited to one team's exposure
Scalability	Scales with demand	Capacity changes take months

Questions We Hear Most

How will you understand our business?

We start with discovery: your priorities, culture, constraints, and goals. Multi-client experience helps us move faster, without treating you like everyone else.

Isn't it cheaper to just hire someone?

One hire gives you one skill set and one point of failure. A Fully Managed PMO gives you a team, proven structures, and execution at scale.

Do we retain control over our projects?

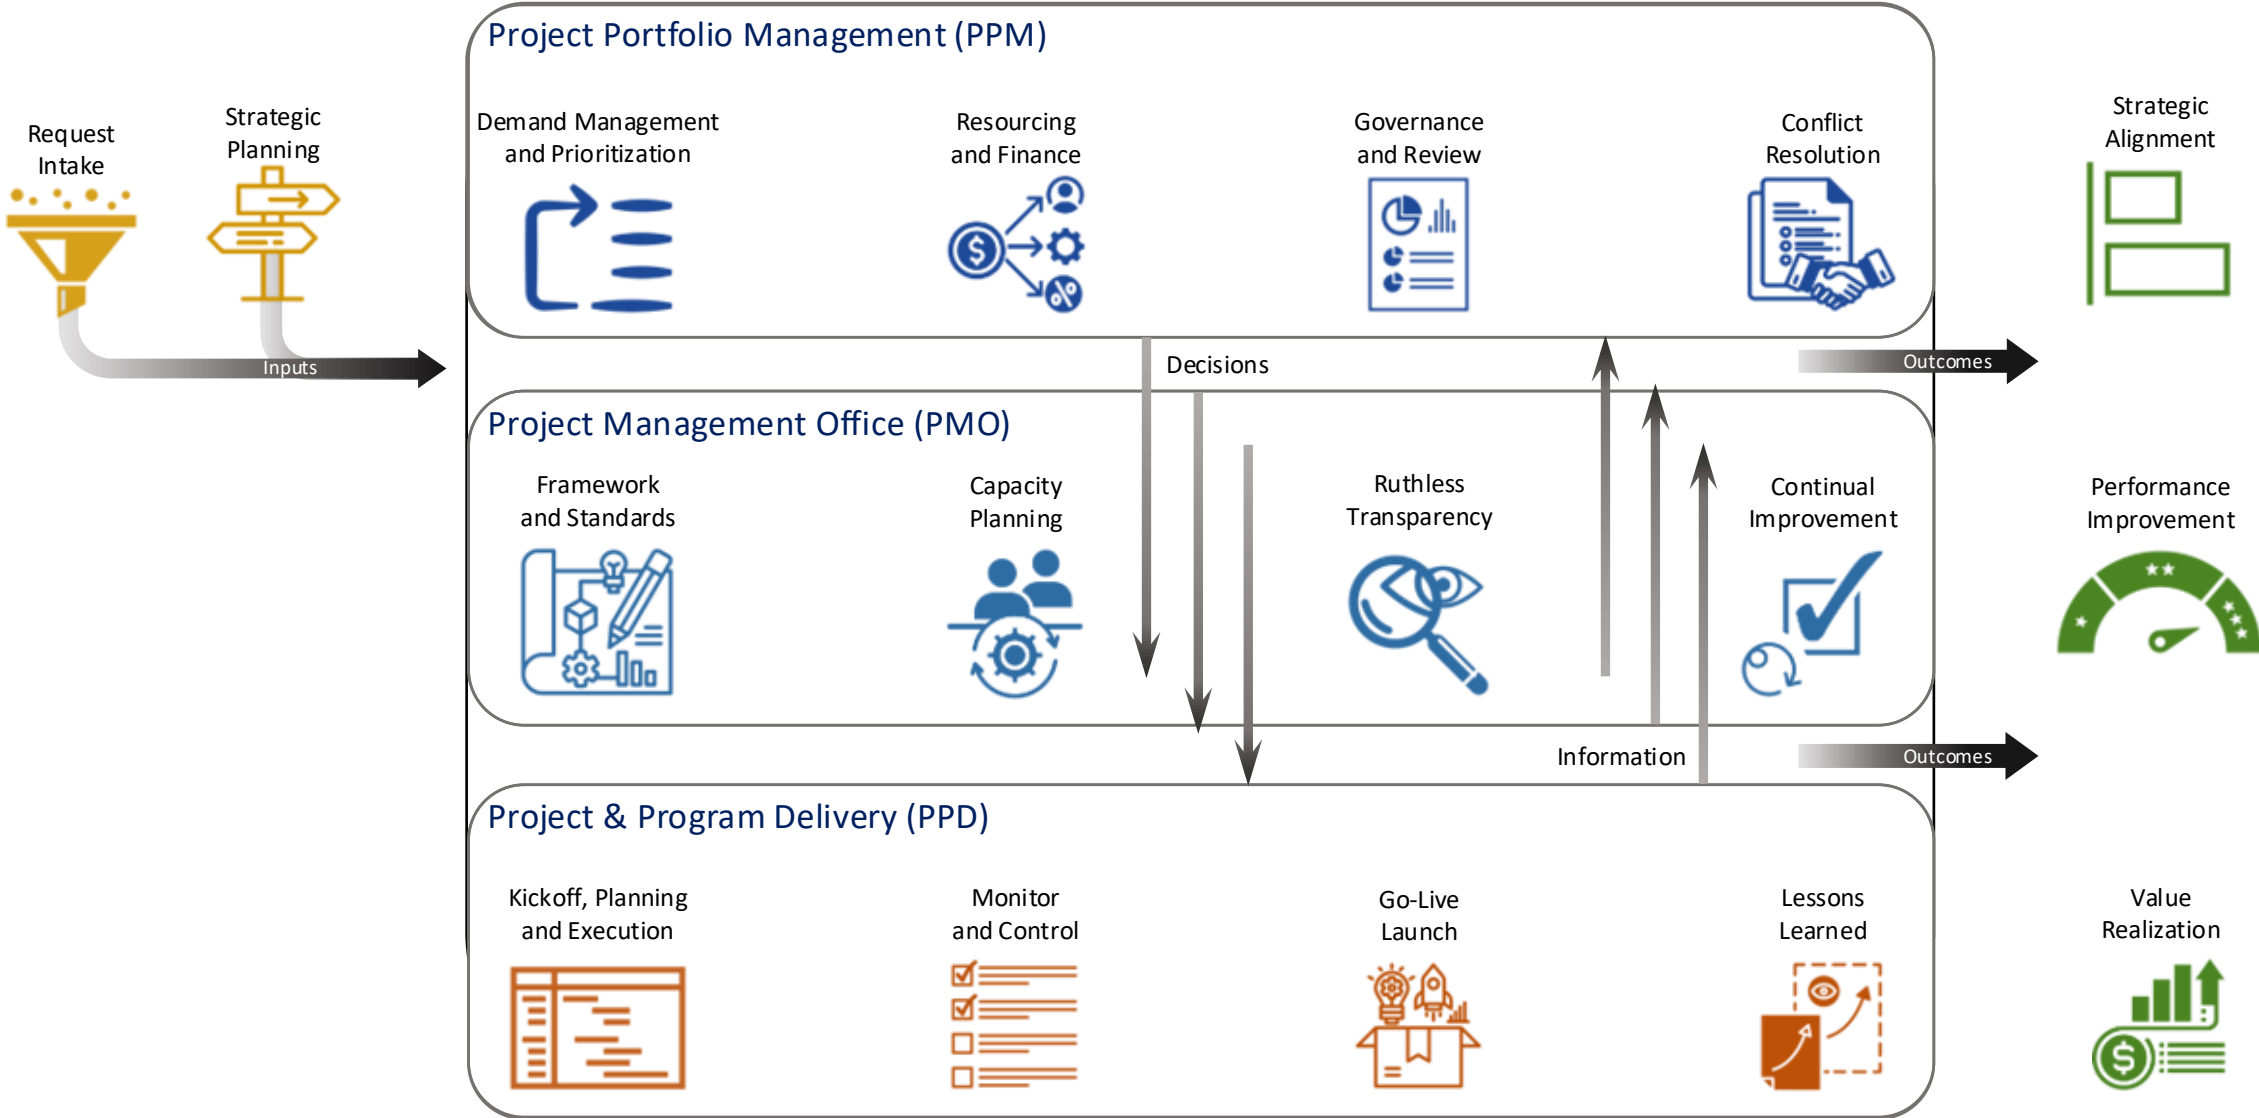

Yes. You retain decision authority. We bring the structure, controls, and expertise to keep execution moving forward.

What do credits buy us?

Credits fund the PMO capacity you need: portfolio governance, alignment, prioritization, project and program leadership, and executive dashboards.

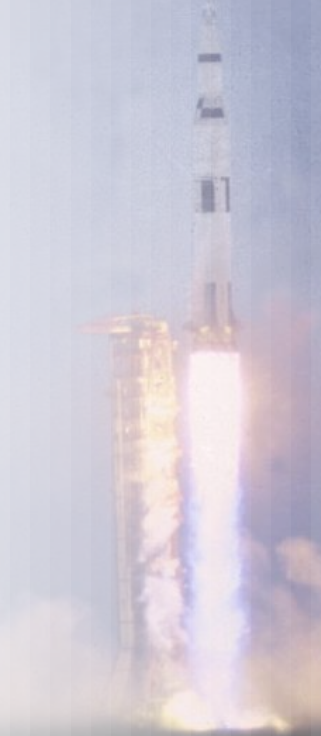

How a Fully Managed PMO Works

Is This Right For You?

A Fully Managed PMO is a fit when:

- Strategic initiatives keep stalling
- Hidden risks surface too late
- Teams are overloaded by competing priorities
- You need faster strategic execution
- Reporting lacks clarity and actionability
- You are preparing for M&A integration or other complex initiative
- You are evaluating PMO effectiveness

Ready to Strengthen Execution?

Start with a 30-minute discovery conversation. We'll review your current portfolio, identify where governance gaps are costing you, and show what a Fully Managed PMO could look like in your environment.
